

Michael Williams is a construction consultant who gets called to different areas of Columbia where he may be staying for hours on end.

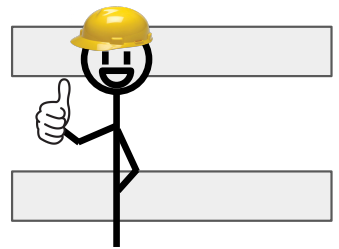

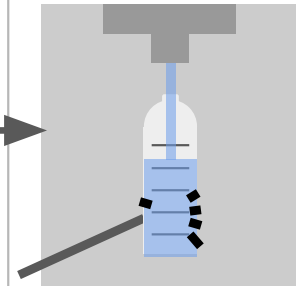

Michael gets thirsty, but because he's in a new area every few days he doesn't know where the water fountains are. He overhears a coworker talking about an app called 'Fountain Finder' that could help someone find water fountains nearby.

Michael downloads the app and allows it to view his location while the app is open.

Michael checks the app when he's thirsty and can see where the closest water fountain is.

Michael fills up his water bottle at the water fountain and is ready to go.

by Parker Lambert

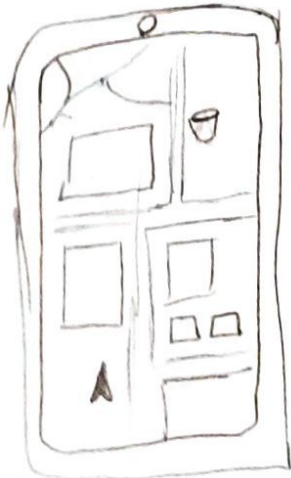

Tasha is going to her grand-daughter's college orientation she is excited but nervous about all she walking

College

As they walk through the campus she takes out her phone to see where the nearest water fountain is.

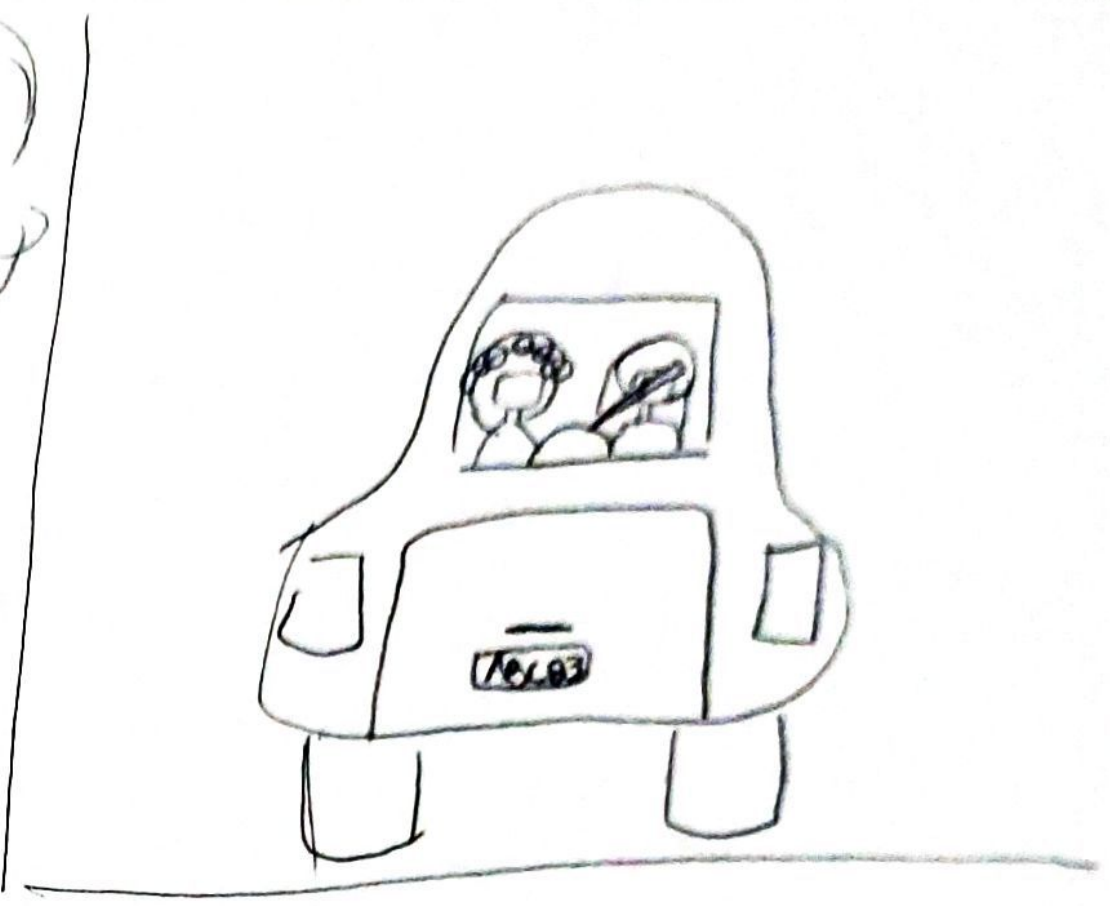

Using the app Tasha is able to see her location in relation to the nearest water fountain, all on her phone! If she were to click on the bucket symbol, she'd also be able to see reviews about the fountain.

Look at her happy hydrated smile!

Now Teresa & her grand-
daughters can enjoy the
scenery all while
following the closest
route to the fountain.

Have a safe Trip
back home & don't
forget hydration is
key!

Storyboard- Patty O'Furniture

Zarria Jiles

Patty normally walks anywhere she needs to go. Whenever she leaves her home, she always has an empty water bottle. But this time she has run out of water.

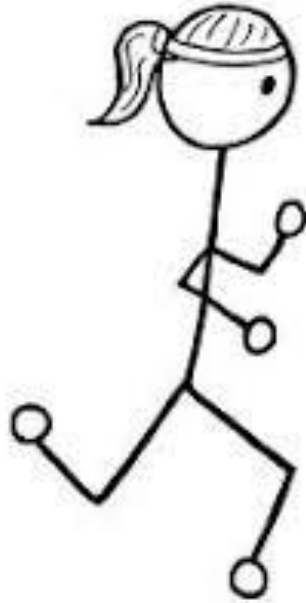

“What will I do? I still have a 20 minute walk left to my class.” Patty then remembers that she has a reliable app on her phone that tells her where free water fountains are on her UofSC campus.

Remembering the app, Patty quickly searches for the nearest water fountain around her and is able to find one in seconds!

She finds an open one on the outside of Russell House and refills her water bottle.

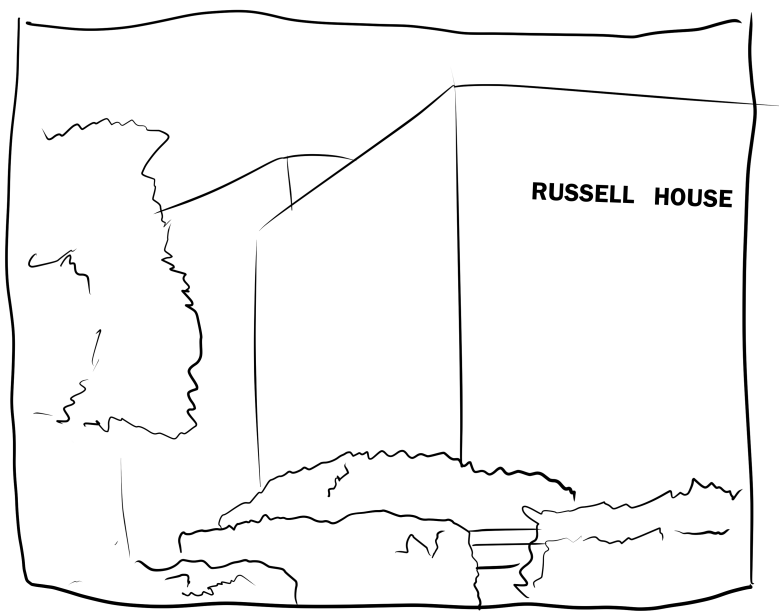

Freshly hydrated, Patty continues her walk to class.

The end!

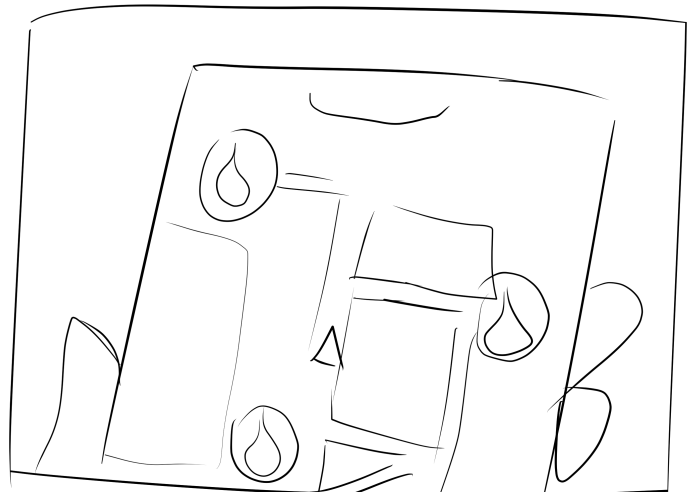

RYAN IS ON A RUN AND NEEDS TO HYDRATE

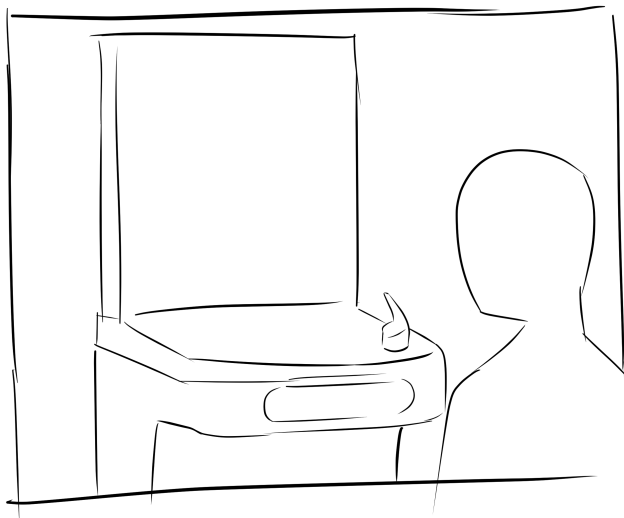

LUCKILY HE WAS AT RUSSELL

HOWEVER RYAN WASN'T SURE
WHERE THE WATER FOUNTAINS WERE

FORTUNATELY, HE HAD AN APP
THAT IS ABLE TO SHOW THE LOCATION
OF WATER FOUNTAINS

NOW RYAN CAN HYDRATE AND
CONTINUE HIS RUN

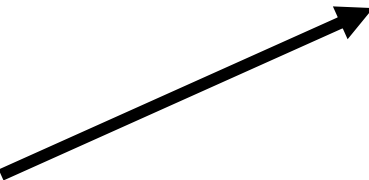

Jeremiah is a professor who just transferred to a new university in a new state.

He teaches two different classes and after finishing his first class he begins walking to the next one across campus.

Luckily one of his students told him about a fantastic app that can help him find a great water fountain so he can take his medicine

Checking his bag for his medicine, he realizes he's left his water bottle at home!

On his way there his smart watch alerts him it's time to take his diabetic medicine.
